

Plot 9: Spin-Schaum-Entwicklung als dynamische Subgraph-Sequenz

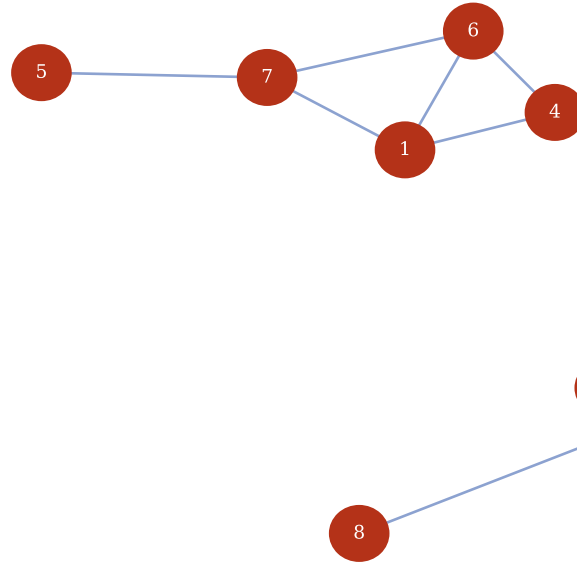

$$G_Q^{(t_0)} \hookrightarrow G_Q^{(t_1)} \hookrightarrow G_Q^{(t_2)}$$

t_0 : Initial-Netzwerk

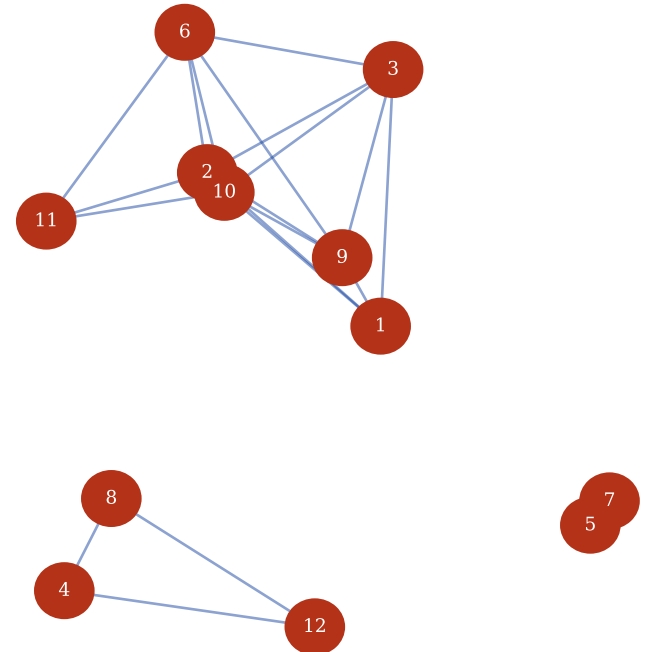

$|V| = 5$, Subgraph-Check in $O(5^3)=125$

t_1 : Nach Koales.

$|V| = 8$, Subgraph-Check in $O(8^3)=512$

t_2 : Verfeinert

$|V| = 12$, Subgraph-Check in $O(12^3)=1728$
