

Transition from Archimedean (1-uniform) to k-uniform Tessellations

1-Uniform (Archimedean)

*All vertices are
identical*

Exactly 11 exists

2-Uniform

*Exactly 2 distinct
vertex configurations*

61 known

3-Uniform

*Exactly 3 distinct
vertex configurations*

39 known

4-Uniform

*Exactly 4 distinct
vertex configurations*

25 known

5-Uniform

*Exactly 5 distinct
vertex configurations*

15 known

$k \geq 6$ -Uniform

*6+ distinct vertex
configurations*

13+ known
