

Shannon-Nyquist Abtasttheorem: Rekonstruktion eines kontinuierlichen Signals aus diskreten Abtastwerten

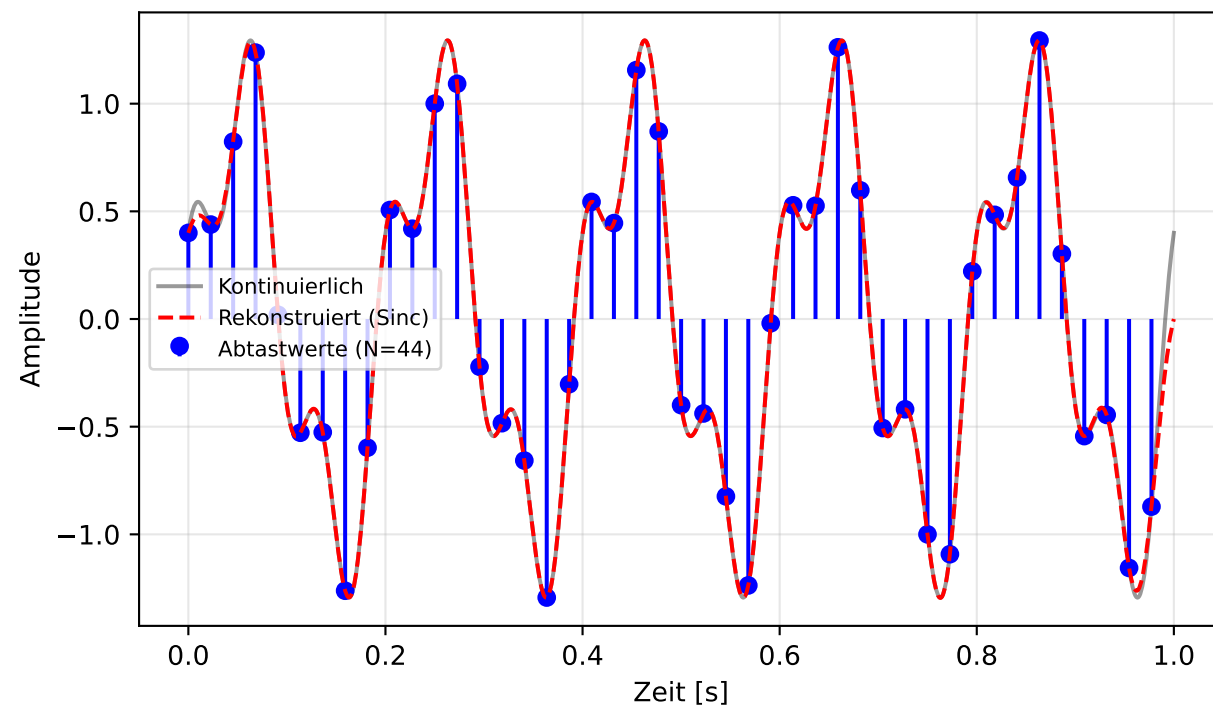

$f_s = 11$ Hz (knapp über Nyquist)
RMS = 0.3934

$f_s = 22$ Hz (Nyquist exakt)
RMS = 0.3949

$f_s = 44$ Hz ($2 \times$ Nyquist)
RMS = 0.0362

$f_s = 200$ Hz (Überabtastung)
RMS = 0.0190
