

Subgraph-Isomorphie auf formalen Grammatiken: Rotation, LCS und Hierarchie

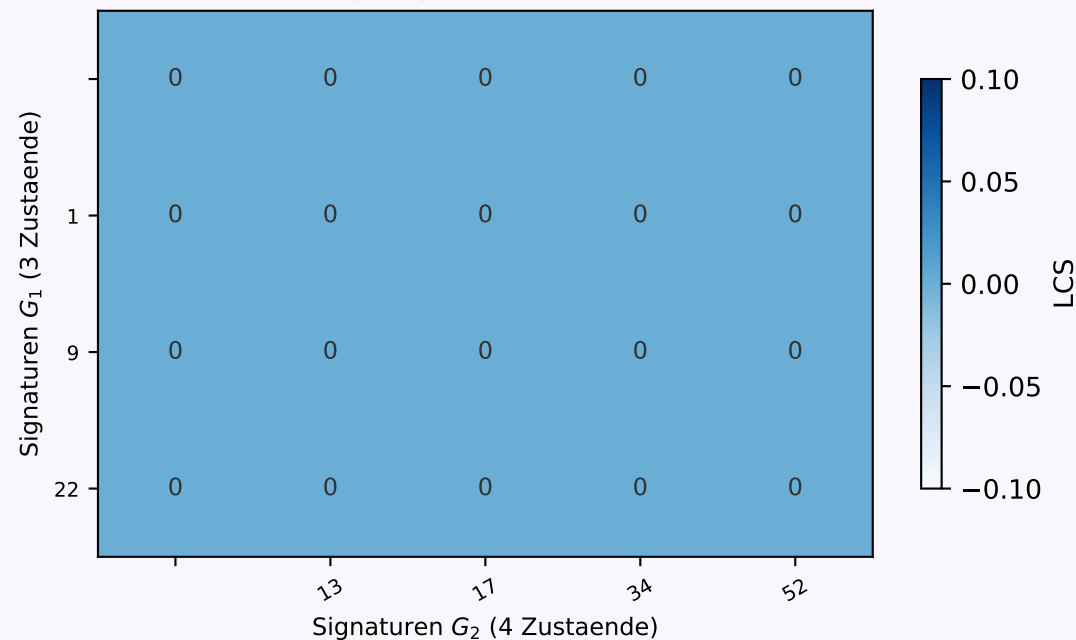

Zyklische Rotation der Signatur-Arrays ($n = 5$ Zustände, 5 Rotationen)

Komplexitätsvergleich (Naiv vs. Subgraph-Algorithmus)

Subgraph-Matching $G_1 \subseteq G_2$?

$|LCS| = 0 \Rightarrow$ **NEIN**

Subgraph-Hierarchie von Grammatikgraphen
